PROFESSIONAL SUMMARY

Frontend Engineer with 5 years of experience building interactive web applications with JavaScript, React, Next.js, and TypeScript. Owned the frontend of a real-time, map-based facility search platform for a Fortune 500 logistics and healthcare client. Experienced in frontend architecture, REST API integration, web accessibility (ARIA), and performance optimization.

SKILLS

Frontend & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js

Core Web: HTML5, CSS3, Tailwind CSS, Responsive Design

State & Data: Redux Toolkit, Zustand, TanStack Query, REST APIs, Authentication, Zod

Testing: Jest, React Testing Library, Cypress

Optimization: Web Accessibility (ARIA), Performance Optimization, Cross-Browser Compatibility

Tools & Practices: CI/CD, Git, Vite, Agile/Scrum, Webpack, AI-Assisted Development

WORK EXPERIENCE

Experience Engineer L2 (Frontend Engineer) | **Publicis Sapient** | Gurugram Sep 2021 – Present

- Owned the frontend of a facility-search platform and rebuilt it end-to-end using modern JavaScript (ES6+), reducing page load time by 38% while supporting 200+ geolocated facilities on Google Maps.
- Built a tiered search flow that matched keywords across 15+ data fields, then fell back to geocoded proximity search, with the search radius adjusting from 100 to 2,500 miles based on the match.
- Built the platform as a fully dynamic single-page application, with a responsive search experience and real-time map interactions. Reduced average search-to-result time to around 400ms, with a reported ~4% improvement in qualified leads following the feature rollout.
- Built a Haversine distance engine and used the browser Geolocation API to support "near me" search. Added a Supercluster-based marker clustering layer to keep map interactions smooth as the dataset grew.
- Set up a centralized state-management pattern for search, filters, pagination, and detail views, with debounced input, error handling, and graceful fallbacks.
- Worked with design and QA to turn Figma designs into pixel-perfect, WCAG-aligned UI. Also added safer rendering, code-splitting, and lazy-loading to improve performance and accessibility.

Customer Support Executive | **Sykes** | Hyderabad

Feb 2020 – May 2021

- Worked with managers and team leads on performance reviews, training programs, and skill development. Prepared progress reports and tracked training outcomes.
- Developed strong written communication, issue triage, and de-escalation skills, directly transferable to translating client and stakeholder requirements into technical solutions as a frontend engineer.

ML Data Associate | **Amazon**, Hyderabad

Sep 2018 – Oct 2019

- Transcribed and annotated voice-command audio data to support Alexa's speech-recognition and NLP training pipeline, maintaining high transcription accuracy standards.
- Participated in recurring internal coding competitions, benchmarking and sharpening problem-solving skills against Amazon engineers.

PROJECTS

OrbitShop | E-Commerce Platform | [Live](#) | [GitHub](#)

- Built an e-commerce platform with product listings, search, cart, wishlist, and a complete checkout flow.
- Added Google OAuth authentication with Firebase, persistent cart and session state, and a light/dark theme switch.
- Used a modular component structure with React Router for navigation and a responsive Tailwind CSS UI.

Tech Stack: React, Redux Toolkit, React Router, Tailwind CSS, Firebase

OpenAero | Interactive Weather Map | [Live](#) | [GitHub](#)

- Built a weather visualization app with an interactive Leaflet map using MapTiler tiles, allowing users to click any location and view live conditions.
- Added 7-day daily forecasts, 48-hour hourly forecasts, AQI, and filters for temperature, precipitation, and wind.
- Used TanStack Query for API state and caching, with Zod for runtime validation of API responses.

Tech Stack: *React, TypeScript, TanStack Query, Zod, Leaflet, MapTiler*

EDUCATION

Bachelor of Technology, Computer Science & Engineering

Neotia Institute of Technology Management & Science, Kolkata, West Bengal

August 2013 - June 2017
