

Abhishek Kumar

Gurugram, Haryana | +91 8292250818 | [GitHub](#) | [LinkedIn](#) | ak89471@gmail.com

Professional Summary

AI-Native Frontend Engineer with 4+ years of experience building scalable, high-performance web applications using React, Next.js, and TypeScript. Proven track record of delivering production-grade, end-to-end interfaces with a strong focus on performance, accessibility, and cross-browser reliability. Skilled in developing component-driven architectures, integrating REST APIs, and leveraging AI-assisted development tools to accelerate delivery and improve code quality in Agile environments.

Skills

Frontend & Frameworks: React.js, Next.js, TypeScript, Tailwind CSS

Core Web: JavaScript (ES6+), HTML5, CSS3, Responsive Design, Accessibility

State & Data: Redux Toolkit, TanStack Query, REST APIs, Authentication, API Integration

Tools & Workflow: Git, Vite, Browser Devtools,

AI & Developer Tools: GitHub Copilot, ChatGPT, Claude, AI-assisted development

Work Experience

Experience Engineer L2

Publicis Sapient | Gurugram, Haryana | September 2021 – Present

- Solely owned and rebuilt the product into an interactive geospatial discovery platform with dynamic search, filters, Google Maps integration, geocoding, and 100-mile radius-based search.
- Implemented advanced location-driven UX workflows using Google Maps APIs and geospatial queries, transforming static browsing into real-time, user-driven discovery.
- Improved performance and accessibility by optimizing JavaScript, CSS, and rendering logic.
- Collaborated with and supported internal teams on React components and frontend patterns, contributing reusable UI components and best practices during bandwidth availability.

ML Data Associate

Amazon | Hyderabad, Telangana | September 2018 – October 2019

- Transcribed and labelled audio commands to improve Alexa's speech recognition and NLU models.
 - Converted short voice interactions into accurate text and tagged user intent for AI model training.
 - Participated in internal coding events and gained hands-on exposure to JavaScript-based tooling and problem-solving
-

Projects

Orbit Shop | [Link](#) | [Github](#)

- Built a full-featured e-commerce platform with product listings, cart, wishlist, and checkout flows using React and Redux Toolkit for state management
 - Implemented Google OAuth authentication via Firebase and client-side persistence for cart and session state
 - Modular component architecture with React Router for multi-page navigation and fully responsive Tailwind
- UI Tech Stack:** React, Redux Toolkit, React Router, Tailwind CSS, Firebase

Interactive Weather Map | [Link](#) | [Github](#)

- Real-time weather visualization app layered on an interactive map, built with React 19, TypeScript, and Leaflet with MapTiler tile rendering
- Feature-first architecture with TanStack React Query for async state/caching and Zod for runtime API response validation
- Deployed on Netlify with environment-variable-gated API keys

Tech Stack: React, TypeScript, TanStack Query, Zod, Leaflet Live

Education

Bachelor of Technology | NITMAS | Kolkata, West Bengal

Computer Science & Engineering | **June, 2017**

Achievements

- Recognized with the “Learning Mindset Award” at Publicis Sapient for proactive upskilling and applying modern frontend technologies to real-world projects.
- Delivered a production-grade frontend application end to end, owning architecture, development, and deployment.
