

Abhishek Kumar

Gurugram, Haryana | +91 8292250818 | [GitHub](#) | [LinkedIn](#) | ak89471@gmail.com

Professional Summary

Software Engineer with 4+ years of experience in frontend development, specializing in JavaScript, React, TypeScript, and Next.js. Experience in delivering production-grade, end-to-end web applications, improving performance, accessibility, and cross-browser reliability. Experienced in building scalable, component-driven UIs, integrating REST APIs, and working in Agile teams to ship high-quality user-facing products.

Skills

Languages: JavaScript, TypeScript, React, Next.js

State & Data: Redux Toolkit, React Query, REST APIs, Authentication

UI & Styling: Tailwind CSS, HTML5, CSS3, Responsive Design

Testing & Tooling: Jest, Unit Testing, Git, CI/CD, Agile Methodology

Work Experience

Experience Engineer L2

Publicis Sapient | Gurugram, Haryana | September 2021 – Present

In this role, I've built and maintained responsive, accessible web interfaces using HTML5, CSS3, and modern JavaScript (ES6+). From translating high-fidelity designs into clean, semantic markup to solving layout bugs across browsers, I owned every pixel of the UI.

- Improved page load performance from 3.7s to 2.3s by refactoring legacy JavaScript, minimizing CSS, and implementing lazy loading techniques.
- Enhanced accessibility compliance from 60% to 95% by implementing semantic HTML, ARIA labels, and keyboard navigation — leading to better Lighthouse scores and user inclusivity.
- Applied component-driven UI architecture and modern frontend engineering practices to improve maintainability and scalability.
- Delivered a production-grade frontend application end-to-end, owning architecture, development, and deployment.

ML Data Associate

Amazon | Hyderabad, Telangana | September 2018 – October 2019

- Transcribed and labelled audio commands to improve Alexa's speech recognition and NLU models.
 - Converted short voice interactions into accurate text and tagged user intent for AI model training.
 - Participated in internal coding events and gained hands-on exposure to JavaScript-based tooling and problem-solving
-

Projects

Orbit Shop | [Link](#) | [Github](#)

- A React-based e-commerce application showcasing scalable frontend architecture, Redux state management, client-side persistence, routing, and modular component design.

Tech Stack: React (Vite), Redux Toolkit, React Router, Tailwind CSS, Firebase

Dashboard Analytics | [Github](#)

- Developed a scalable analytics dashboard with reusable React components, Redux-based state management, and responsive UI patterns for modern admin interfaces.

Tech Stack: React, Redux Toolkit, Tailwind CSS, Recharts, React Router

Education

Bachelor of Technology | NITMAS | Kolkata, West Bengal

Computer Science & Engineering | **June, 2017**

Achievements

- Recognized with the “Learning Mindset Award” at Publicis Sapient for proactive upskilling and applying modern frontend technologies to real-world projects.
- Delivered a production-grade frontend application end to end, owning architecture, development, and deployment.
